

MO-94-LA

Surgery and implantology motor with light (LED) and Hall sensors, sterilizable.

Dassym reference 102.08.000

Motor data

Speed Range	80 up to 40000	rpm
Torque at maximum allowed current	5	Ncm
External diameter	21.8	mm
Motor length	55	mm
Weight	99	g

Other specification

Number of pole pairs	1
Number of phases	3
Sterilization	135 °C
Number of wire connected to the motor	5
